## REFERENCE

**Respect Energy Holding** is a leading European trader of renewable energy that serves as a one-stop shop for green energy investors in Europe.

We are pleased to announce that Respect Energy has been working with dataconsulting.pl on Snowflake Data Cloud technology since 2022. Throughout our collaboration, dataconsulting.pl has demonstrated a great openness and flexibility in meeting our technical and business objectives.

We have worked with dataconsulting.pl in the areas of cloud data infrastructure, data processing and specialist consultancy for Snowflake Data Cloud.

dataconsulting.pl carried out an audit of the Data Lakehouse, Data Pipelines and Data Orchestration. The objectives were also to determine the optimal data infrastructure architecture, as well to identify the optimal technology, and furthermore a way of processing data in the individual steps of collecting data from many different sources to determine the most suitable mechanism for data orchestration.

dataconsulting.pl is also working on a project to extract valuable business insights based on spatial data analysis and GIS data processing in Snowflake Data Cloud, by combining data from many sources.

In finishing, most noteworthy was the commitment and professionalism of Przemysław Kantyka and Rafał Stryjek. We therefore have no hesitation in recommending dataconsulting.pl as a strong technical partner.
